AI Cheat Sheet

Pro Tips

Calculate total production per week, starting on Sunday. Then, convert "Weekly Total" to cost - price is $289.00/kg.

Actions ⌄

Choose the right Agent ●

Be clear & direct Use short, specific prompts

Iterate Refine, re-run prompt

Check math Verify formulas in chat or w/ Edit

Specify units to help AI derive answer; e.g., "kg"

Name items e.g., "Use "XYZ123" to (...)"

Break it down Use "Then," to guide multi-step analysis

New topic? **Start a new chat!**

Agents

🤖 Actions

Act Load data, do analytics, change display, write Journals, make Organizers...

```
Load the signal named "Temperature(any
characters)-U4" from the "Example"
datasource
```

```
Calculate the moving average of
Pressure-FY56
```

```
Add a summary of my analysis to the
journal
```

🤖 General

Seeq guide Outline steps or analytics methods, which Seeq feature to use, etc.

```
What types of data cleansing can I do?
```

```
Does Seeq have a data connector to
(X)?
```

```
How can I calculate monthly dollars
lost because of wind turbine
curtailments?
```

🤖 Data Lab

Write & learn about **python scripts, SPy functions, add-on creation**

```
How do I pull all the data on my
worksheet into a python notebook?
```

```
Create an add on using ipyvuetify
to (…)
```

```
How do I put a Python graph in my
Organizer?
```

🤖 Formula

Write & learn about **Formula functions**

```
Create a condition that finds the
first shut down event in each week.
```

```
What parameters does the
removeOutliers() function take and
what are they for?
```

```
How to change this formula from weekly
to yearly aggregation? (enter formula)
```

Troubleshooting

+ New Chat periodically & after unsuitable responses

Check Agent choice e.g. 🤖 is best for python/code

Undo Use Before link @ bottom of Journal (for Actions) Then retry prompt

Redo Click the retry icon ↻ ; rephrase the prompt

"Invalid"/does not answer Rephrase prompt

Check Details Pane Actions only does calculations on items in current Worksheet
